Scuba N1 Pro

Key Features

Premium Cleaning Performance - The dual-layer filtration system works in tandem with the quad-brushless motors, dedicating more power to scrubbing and filtration, enabling the device to pick up and store debris as small as 3 microns in the massive 5-liter debris basket. A truly premium clean for your pool's floor, walls, and waterline all in one device, the Scuba N1 Pro.

WaveLine™ Technology - The industry first cordless robotic pool cleaner to feature horizontal waterline cleaning capabilities. The Scuba N1 Pro possesses impeccable flow control and infrared sensors that aid the N1 Pro in maneuvering around your pool, including the obstacles in it.

Dual Layer Filter - The 180-um and 3-um filters collect dirt and dust even the naked eye can't see, improving the water purity in your pool and protecting you and your health every time you swim from unseen bacterial threats.

Advanced Obstacle Avoidance - Four infrared sensors on the device work to detect pool walls, stairs and large obstacle, allowing it to adopt its path for a complete clean.

Other Features

WavePath™ Navigation Technology 2.0 - Leveraging cutting-edge technology, WavePath™ 2.0 takes advantage of the natural flow of your pool, thereby increasing cleaning coverage. Top-of-the-line sensors allow the device to pinpoint the device location within your pool, delivering the most pristine clean for your pool's floor, walls, and waterline.
